

# *She said YES...*

## now let's celebrate

### *vision & location*

Your engagement session is designed to get you comfortable in front of a camera, it is also a great opportunity to set the vision and tone on the wedding day. When choosing a location, imagine where you both are most comfortable in your element, where you wish you could spend timeless hours, maybe is the place where you met, or your favorite vacation place, or the hobbies you like to do together, even just relaxing at home watching movies and eating popcorn. Whatever it is and wherever it is, it will help keep your engagement photos unique and dear to your heart, it can also be a huge opportunity to connect

with your photographer and begin to feel relaxed, joyful and beautiful.

### *hair & makeup:*

Who doesn't like to look their best?! Looking and feeling confident are two very important concepts and they come hand in hand when it comes to engagement photos. If you feel confident it will show, before your engagement session, take some time to yourself to relax and find that inner Beyonce we all have inside.

There is plenty of good reasons why getting your hair and makeup professionally done for your session is best: it will allow you to relax, be and feel pampered,

it will help your natural beauty shine through the camera lens and, it is a great time to try wedding hair and makeup before the big day.

*Imagine  
where you  
wish you  
could spend  
timeless hours*

*Love is many things  
and sometimes we  
are not sure if it even exists,  
but all i know is if  
you were to show me  
her soul in a photograph,  
I wouldn't even ask  
to see others.*
